

Answers to Outdoor Adventures

Page 1

This insect is called a Stink Bug. Stink bugs eat leaves, flowers and other insects. When a stink bug feels threatened or feels like someone is going to harm them or their home, they raise up their hind legs and lift up their stomachs and release a foul smelling odor.

Page 2

The white thing that is resting on the leaves is a white feather. It came off of a bird as it was flying and the breeze blew it until it rested on the bush.

Page 3

This animal is a lizard. It eats small insects like crickets, worms, flies and spiders. This lizard is camouflaged, which means that he is the same color of his environment so that he will not be easily seen in order to be protected from predators that would try to harm him.

Page 4

The animal that is hiding in the shade is called a rabbit. This species of rabbits that we see all over our city is called a European Rabbit, which means that the species originated from European countries like Spain, Portugal and France. They eat grasses and berries.

Page 5

Life drawing of a lizard on a tree trunk. Look at the shapes and colors and do your best to draw how you see it. We would love to see your pictures.
